Distillation Apparatus, Marcusson

Laboratory glassware · with splash head and bulb · technical datasheet

جهاز تقطير ماركوسون مع رأس مانع للرذاذ وانتفاخ

Product	Distillation apparatus according to Marcusson, with splash head and bulb
Category	Laboratory glassware · distillation
Assembly	Round-bottom flask, splash head with bulb, connecting bridge, coil condenser and graduated receiver
Ground joint	NS 29/32
Standard	ISO 835
Packing	1 piece per pack
Typical use	Water determination by distillation (Marcusson method) in oils, lubricants and petroleum products

VERSIONS

Catalogue No.	Package height	Joint	Packing
1632441617940	1000 mm	NS 29/32	1 pc
1632441617950	2000 mm	NS 29/32	1 pc

FEATURES

- Splash head with bulb keeps boiling liquid from being carried over into the condenser.
- Coil condenser for condensing the distillate before it reaches the receiver.
- Graduated receiver for reading the collected volume directly.
- Standard ground joints (NS 29/32) for simple assembly and replacement of parts.

ORDERING

Ask Six Winds for price and stock: state the catalogue number (package height 1000 mm or 2000 mm) and the quantity. Technical questions on request.
