Insulating Varnish, 1000 ml

Allopar · electrical insulating varnish for coils, transformers and motor windings · technical datasheet

Product	Insulating varnish (liquid), brush or dip application
Maker	Allopar
Use	Protects coils, transformers and motor windings against arcing discharges, moisture and oxidation
Protection	Premium insulation; moisture resistant (prevents corrosion); withstands extreme conditions and extends equipment life
Content	1000 ml tin
Hazard marking	Flammable, health hazard, irritant (GHS pictograms on the tin): use in a ventilated area, away from ignition sources; see the safety data sheet
Typical applications	Rewinding and maintenance of motors, generators, transformers, coils and panels; protection of windings after repair

FEATURES

- Premium insulation: protects coils, transformers and motor windings from moisture and oxidation.
- Moisture resistant: shields against moisture and prevents corrosion for long-lasting reliability.
- Enhanced durability: withstands extreme conditions and extends equipment life.
- Trusted quality: engineered to deliver consistent results.

ORDERING

Ask Six Winds for price and stock: state the quantity of 1000 ml tins. Technical questions and safety data sheet on request.
